

Unit 1 Overview- Health & Social care BTEC YEAR 10 unit 2 health and social care values

You will learn about: what good practice in health and social care is, what ensures it is applied and how it helps individuals who use services. You will explore the care values that underpin current practice in health and social care and you will investigate ways of empowering individual service users.

You will be able to:

- Demonstrate knowledge and understanding of what care values are and how they are used to support users
- Apply knowledge and understanding of the use of care values in a selected health and social care context
- Analyse and justify ways that care workers can empower individuals
- Explain the importance of taking individual circumstances into account when planning care that will empower them
