

Unit Overview – Matter 2

Target grade for tests:

You will learn about:

- Periodic table
- Chemical formula

You will be able to:

- Communicate ideas
- Construct explanations

Key learning points		Key Words
Describe the periodic table		Particle
Describe groups and periods within the periodic table		Intermolecular forces
Describe properties of elements based on their position within the periodic table		Mixture
Define elements, compounds and mixtures		Element
Identify what polymers are and some uses for them based on their properties		Compound
Be able to deconstruct chemical formula		Periodic table
Be able to write chemical formula		Periods
Describe properties of ceramics and composites		Groups
Skills: communicate ideas		Polymers
Skill: construct explanations		Properties
		Chemical formula
		Ceramics
		Composites
		Boiling point
		Melting point
		Reactivity
