

Biology (Triple award) Year 11

You will begin year 11 by studying how the human body responds to changes in our environment (topic B5. Homeostasis). This is an important topic and will take you up until Christmas to complete.

In your November exams you will be given the opportunity to improve on your Biology Paper 1 grade from the end of year 10. This will help you to ensure that your knowledge of year 10 content is secure before moving on to the rest of the year 11 course.

After Christmas, you will study inheritance and evolution and will develop and understanding of the role of genes in our development as individuals and as a species (Topic B6 Inheritance and evolution).

You will be assessed on topics B5. Homeostasis and B6. Inheritance and evolution in your January exam.

Your final biology topic will investigate the interaction between organisms and their environment. You will be assessed on this final topic in class ahead of your GCSE exams.

Assessment	Units being assessed		Working Towards Target	At Expected Target	Above Expected Target	Test grade
November exam	<u>Biology Paper 1:</u> B1 Cell biology B2 Organisation B3 Infection and response B4 Bioenergetics					
Overall performance						
FFL:	Meeting behaviour for learning standards	Actively engaged in the learning	Regularly complete HWK to a high standard	Completing CWK to a high standard	Is a resilient learner 'Doesn't give up easily'	
Achieved:						

Assessment	Units being assessed		Working Towards Target	At Expected Target	Above Expected Target	Test grade
January exam	B5 Homeostasis B6 Inheritance and evolution					
Overall performance
