

Year 11 – Computer Science

Target for Year 11 is 9 (Single grade 1-9) At Penryn College we grade all tests 9-1 (9 is the best)

During this year in Computer Science, you will be expected to learn about:

- Relational databases and SQL
- Computer Networking
- Cyber security threats, detection and prevention
- Different types of software including the role of the OS

		Working towards	Is at the expected standard	Is above expected standard	Test grade
UNIT 1	Relational Databases and SQL				
	Computer Networks				
	Cybersecurity				
FFL:	Meeting Behaviour for learning standards.	Actively Engaged in the learning.	Regularly completing homework to a high standard.	Completing class work to a high standard.	Is a resilient learner, “Doesn’t give up easily”.
Achieved					

		Working towards	Is at the expected standard	Is above expected standard	Test grade
UNIT 2 Revision	Software Types and the OS				
	Binary and Data				
	Hardware				
	Algorithms				
FFL:	Meeting Behaviour for learning standards.	Actively Engaged in the learning.	Regularly completing homework to a high standard.	Completing class work to a high standard.	Is a resilient learner, “Doesn’t give up easily”.
