

## Physics (Triple award) Year 11

You will begin year 11 by completing your work on forces from year 10 (topic P5 Forces).

In your November exams you will be given the opportunity to improve on your Physics Paper 1 grade from the end of year 10. This will help you to ensure that your knowledge of year 10 content is secure before moving on to the rest of the year 11 course.

You will then move on to study space physics (P8 Space) and the interaction between electrons and the Earth's magnetic field to generate current (P7. Magnets and electromagnetism).

You will have a final attempt to secure your knowledge of the fundamentals of physics in your January Physics Paper 1 exam. Completing multiple Paper 1 assessments will give you experience of completing full exams in the hall. All other topics completed in year 11 will be assessed in class.

In your final physics topics will study the electromagnetic spectrum (P6 Waves). You will be assessed on these final topics in class ahead of your GCSE exams.

Assessment	Units being assessed		Working Towards Target	At Expected Target	Above Expected Target	Test grade
November exam	P1. Energy P2. Electricity P3. The particle model of matter P4. Atomic structure					
Overall unit performance						
FFL:	Meeting behaviour for learning standards	Actively engaged in the learning	Regularly complete HWK to a high standard	Completing CWK to a high standard	Is a resilient learner ‘Doesn’t give up easily’	
Achieved:						

Assessment	Units being assessed		Working Towards Target	At Expected Target	Above Expected Target	Test grade
